My learner has really enjoyed this coding class. She has excelled in her understanding of two programming languages over the course of the last six or so months she has been in this class. My child reports that MissB is really great at explaining the concepts and is good at helping them figure out what's wrong with their code. She is excited to continue and has plans to make their own website some day!

My 10 year old boys have been taking Ms Bhavana's class for last few months love Ms Bhavana's class and they look forward to her class every week. She is very patient with the boy and over last few months they have learnt a lot in her class. She listens to them and adjusts the classes according to their level. I would highly recommend her to anyone who wants to learn coding.

MissB was an absolutely amazing help to my son and his coding questions. She went over and beyond expectations to help him. She is extremely knowledgeable and teaches very well. She is one of the best teachers on Outschool. I am signing my son up for more of her classes!
